

5 Signs Your Business Is Invisible Online

Free visibility checklist | weroi.net

Not broken. Not bad. Just harder to find than it should be. This checklist is a quick, honest look at how visible your business really is. No website required.

1**People can't find you when they search**

If someone searches for what you do, nearby, on Google or Instagram, and your business does not show up, it does not matter how good you are. You are not even in the running.

2**Your online presence doesn't match how good you actually are**

Great businesses get judged by weak signals: a missing Google Business Profile, no photos, an inactive Instagram, or a website that does not reflect your quality. Customers assume what they see is what they will get.

3**There's no way to prove you're trustworthy at a glance**

No reviews, no real photos, no clear way to contact you. A stranger decides in seconds whether to trust a business enough to reach out. Without visible proof, even great businesses get skipped.

4**Interested customers fall through the cracks**

Someone messages you, calls, or visits. Without a simple follow-up system, leads get forgotten. Not because you do not care, but because nothing is catching them.

5**You don't know where you're actually losing people**

Most owners are guessing. Are people finding you and leaving? Never finding you at all? Without visibility into your numbers, you are solving problems you have not identified yet.

If two or more of these sound familiar, your business likely is not the problem. Visibility is.
